EDUCATION & HONORS

The University of Arizona, *Bachelor of Science*, Tucson, AZ

Aug 2025 - May 2028

- **Double Major:** Computer Science and Data Science; **GPA:** 4.0
- **Honors:** W.A. Franke Honors College, DataFest Best Insights Winner, JTED MME Scholarship

SKILLS

Languages/Frameworks: Python, C#, Java, SQL, JavaScript, HTML, ASP.NET MVC/Core, .NET, Entity Framework

Tools & Concepts: Git, Linux, VS, VS Code, Jira, DuckDB, SQL Server, full-stack development, database-backed web applications

EXPERIENCE

UA Eller College of Management, *Full-Stack Software Developer*, Tucson, AZ

Aug 2025 - Present

- Maintain and improve **eSMS**, a multi-project **advising and career-services platform** with role-based Student, Admin, Employer, Events, Admissions, Mobile API, and background-job applications.
- Develop across a hybrid **ASP.NET MVC/Core** codebase using **C#, JavaScript, HTML, SQL Server, and Entity Framework**, supporting **legacy .NET Framework** systems and migration to **modern .NET**.
- Debug **production issues** involving live data and active users; implement user-facing and administrative features through layered **controller, service, repository, model, and ViewModel architecture**.

NASA Space Grant, *Undergraduate Researcher*, Tucson, AZ

Aug 2026 - Present

- Lead technical efforts to improve data-processing and storage workflows for a high-speed CMOS astronomical imager generating ~20 TB per 10-day observing run.
- Develop Python-based tools for image analysis and data processing while supporting observations at Kitt Peak National Observatory.

UA Mathematics Department, *Undergraduate Learning Assistant*, Tucson, AZ

Aug 2026 - Present

- Mentor **Calculus II students** through guided problem-solving, concept review, and collaborative practice.

Tanque Verde Unified School District, *Data Analyst*, Tucson, AZ

Aug 2024 – May 2025

- **Selected by the principal** to collect district conference data and extract actionable insights for improvement efforts.
- **Analyzed student benchmark metrics** using Java to identify performance trends and communicate findings to administrators.

Hermosa Montessori Charter School, *Late Care Instructor*, Tucson, AZ

Aug 2024 – May 2025

- Supervised and supported students from pre-K through middle school in an after-school program.

PROJECTS

ASA DataFest ASU/UA | **SQL, DuckDB, Python | Best Insights Winner**

Spring 2026

- **Analyzed multi-million-row datasets** under a 48-hour constraint using SQL/DuckDB, Python, and structured data exploration.
- **Extracted actionable insights** using **machine learning** and presented findings to industry professionals and statisticians; awarded Best Insights among competing teams.

Battleship Neuroevolution | **Python, Simulation | SUnMaRC Presenter**

Spring 2026

- **Designed and implemented a neuroevolution-based neural network** to optimize Battleship offense strategies through large-scale simulation.
- Presented neuroevolution-based Battleship optimization research at SUnMaRC as the University of Arizona's **only female student presenter**, communicating technical results to an academic audience.

LEADERSHIP

Raspberry Pi Java Game Project, **Project Manager**, Tucson, AZ

2024 - 2025

- Led team workflow for a Java-based Raspberry Pi game project, using Jira to organize tasks, track progress, and coordinate development milestones.

Community STEM & Computer Science Outreach, **Tucson, AZ**

2023 - 2025

- Advocated to school administration for a **computer science program** at Tanque Verde High School, helping expand student access to programming education.
- Helped establish a **Robotics Club** to create hands-on opportunities in coding, engineering, and technical problem-solving.
- Taught chemistry at science events, co-created a women-in-STEM event, and volunteered in literacy and food-bank service.
