and Chloe Florence**

Where do we extend medical access?

Mean Annual Visits by Registered SV Patients, by Census Tract

Distance and visits follows a piecewise log-linear relationship

For SVH, encounters from nearby patients decrease by 2.16% ($p < 2e-16$) per additional mile from SVH, within 21.09 miles (SE = 0.495)

Constant beyond threshold

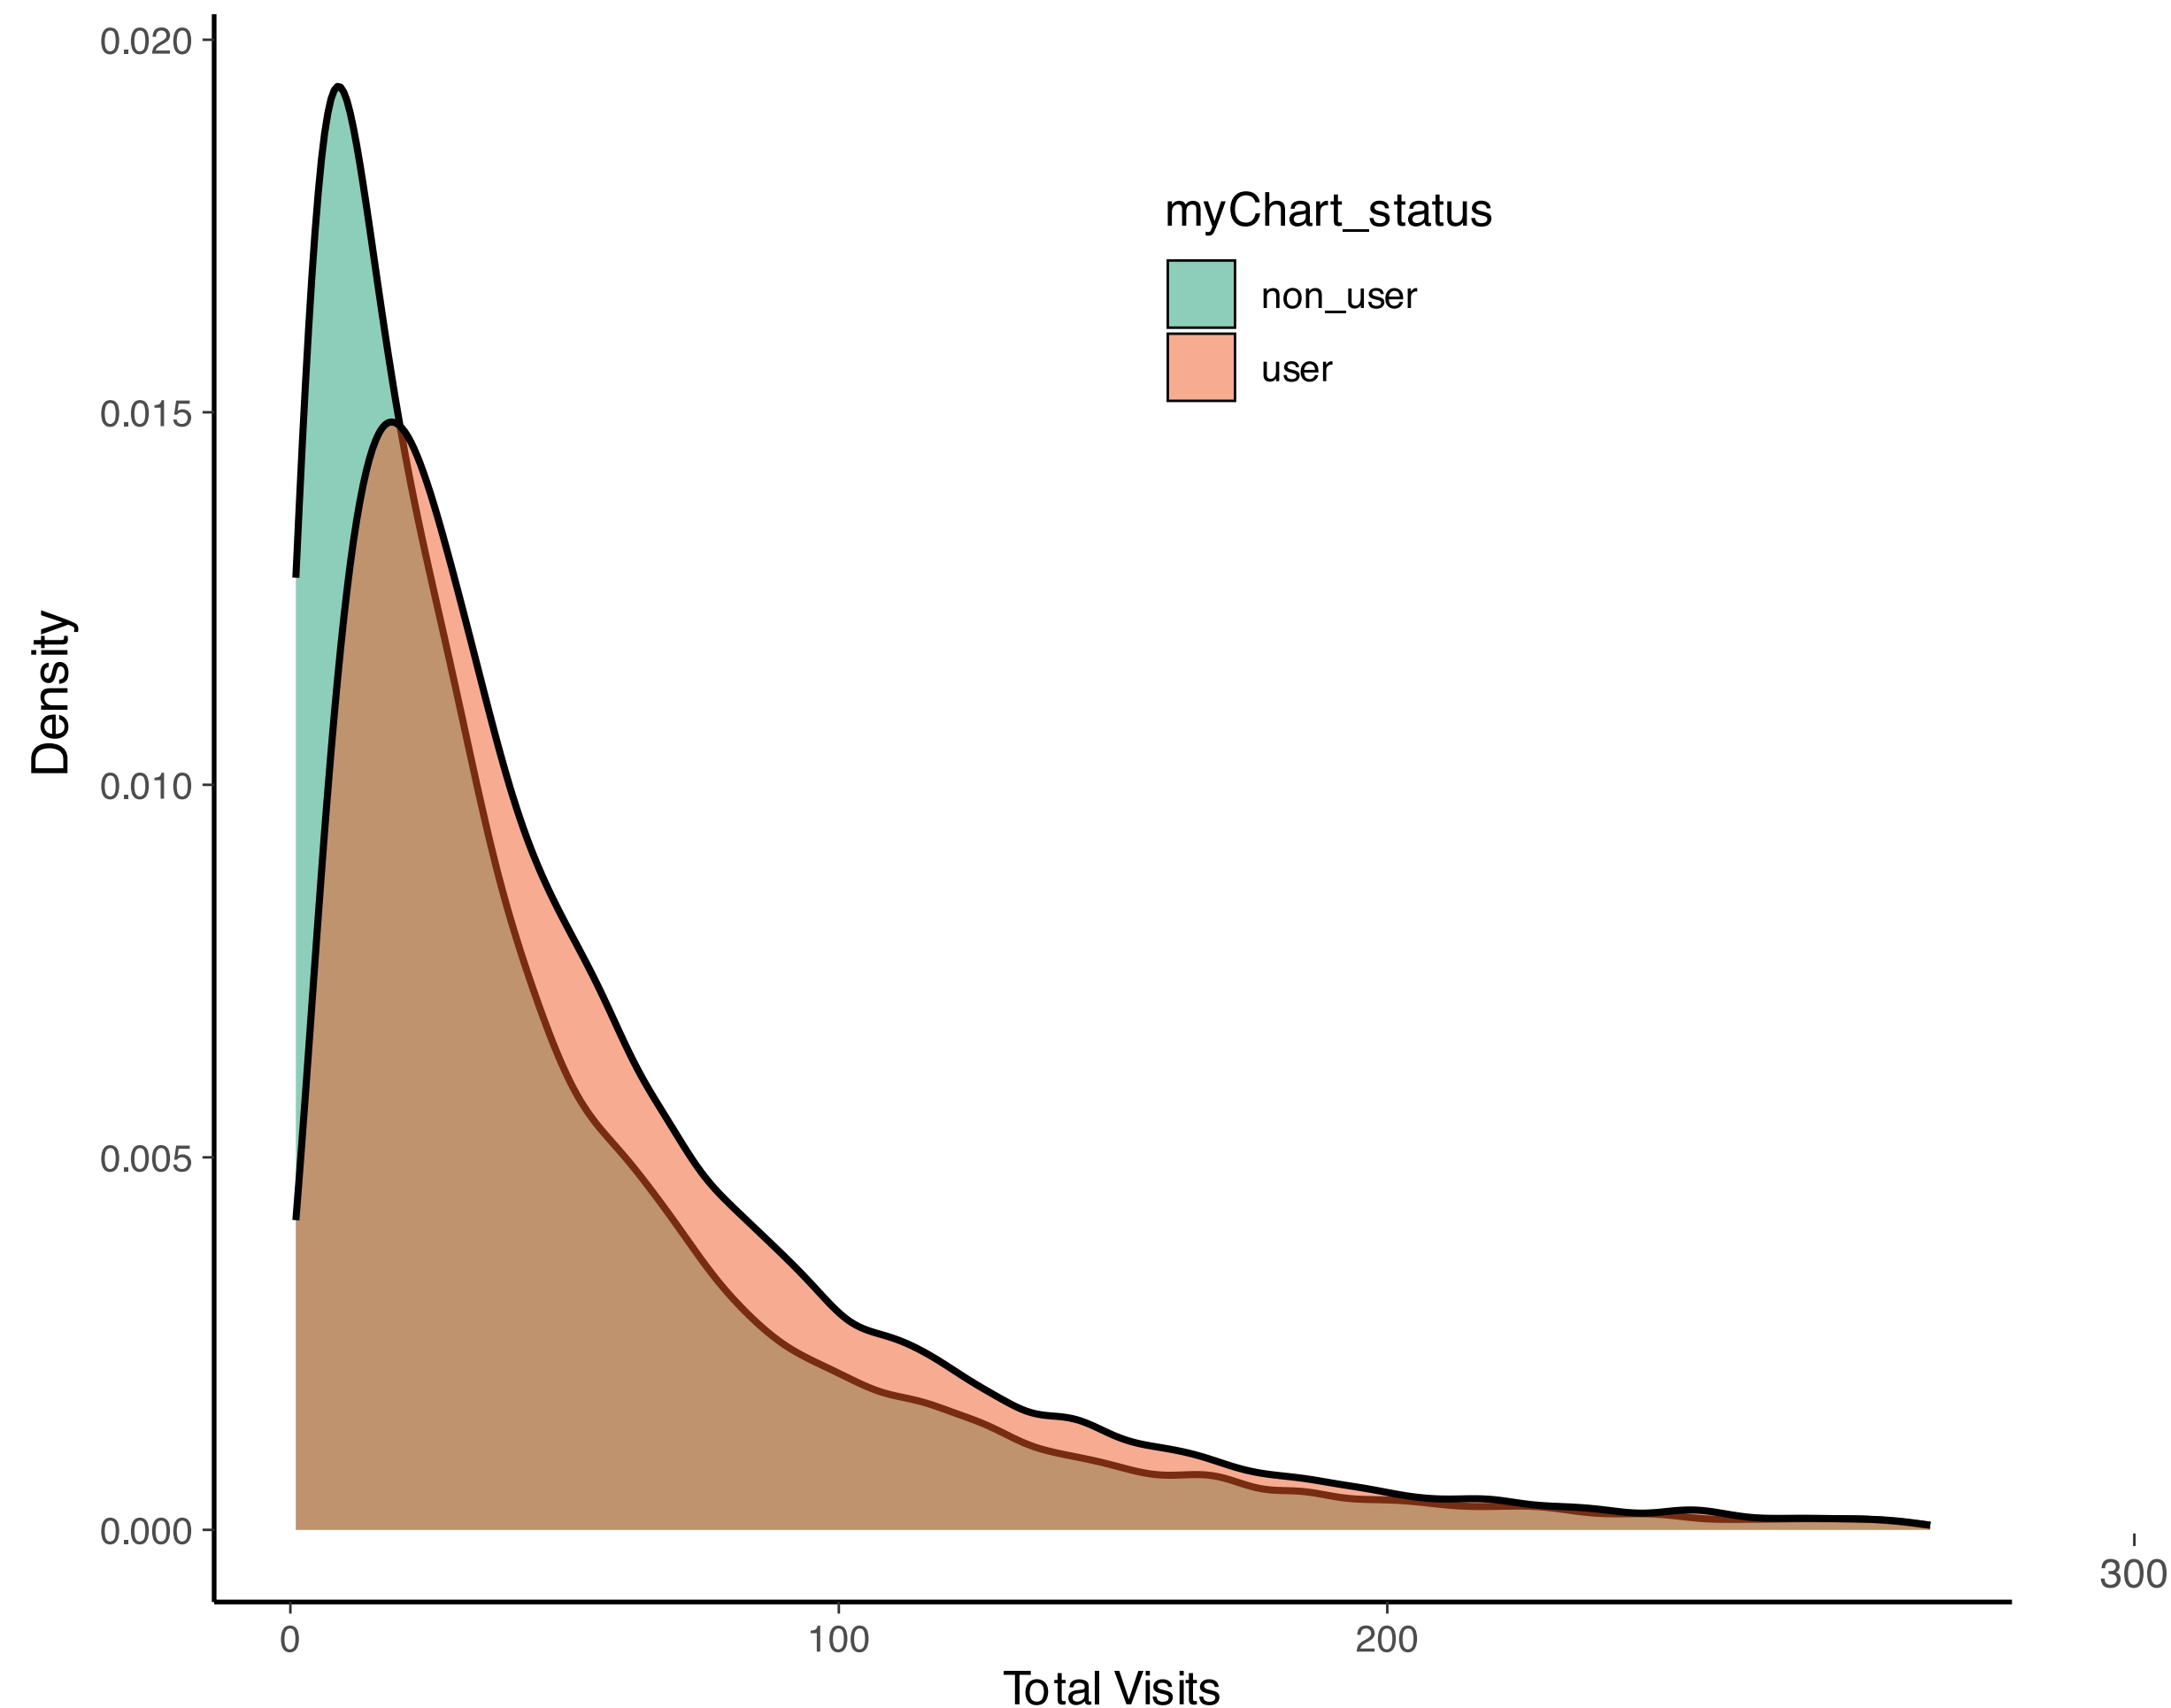

By using this method on every clinic, we can find ideal placement for new hospitals in non-urban areas

Does Patient use of MyChart Indicate more Total Visits for patients with Chronic conditions? (Hypertension)

Total Visits by MyChart status for Patients with Hypertension

95% confidence that the patients with MyChart had a true increase of 11.15 to 13.36 appointments during 4 year span

Statistically significant interaction between distance from SVH and MyChart status on Total Visits

Top 6 Diagnoses of Chronic Conditions At Stormont Vail
